

Serial No.: 09/414,764

Group Art Unit: 3761

CLAIM LISTING

1. (Previously presented) A dry expanding tampon pledge comprising:

a plurality of non-absorbent fibers; and

a plurality of absorbent fibers, wherein said plurality of absorbent fibers is a combination of rayon fiber and superabsorbent fiber, and wherein a ratio of rayon fiber to superabsorbent fiber is about 70/30,

wherein said plurality of non-absorbent fibers and said plurality of absorbent fibers are blended together to form the dry expanding tampon pledge, and

wherein immediately after complete ejection from an applicator, and prior to contact with menses, the dry expanding tampon pledge has a free diameter at a widest point from about 25% to about 300% larger than a diameter of the dry expanding tampon pledge in the applicator.

2. (Original) The tampon pledge of claim 1, wherein a percent ratio of said plurality of non-absorbent fibers to said plurality of absorbent fibers is about 25/75 to about 65/35.

3. (Original) The tampon pledge of claim 1, wherein said plurality of non-absorbent fibers are selected from the group consisting of polyester, polypropylene, polyethylene, aramid, nylon, acrylic, bicomponent, and mixtures thereof.

4. Canceled.

Serial No.: 09/414,764

Group Art Unit: 3761

5. (Original) The tampon pledget of claim 1, wherein said plurality of non-absorbent fibers are polyester fibers.

6. Canceled.

7. (Original) The tampon pledget of claim 1, wherein said plurality of non-absorbent fibers are about 0.75 to about 30 denier.

8. Canceled.

9. Canceled.

10. Canceled.

11. Canceled.

12. Canceled.

13. (Original) The tampon pledget of claim 1, wherein the plurality of absorbent fibers are about 0.75 to about 30 denier.

14. (Original) The tampon pledget of claim 1, further comprising a coverstock.

15. (Canceled).

Serial No.: 09/414,764

Group Art Unit: 3761

16. (Previously presented) A dry expanding tampon pledge comprising:

a plurality of non-absorbent fibers; and

a plurality of absorbent fibers, wherein said plurality of absorbent fibers is a combination of rayon fiber and superabsorbent fiber,

wherein said plurality of non-absorbent fibers and said plurality of absorbent fibers are blended together to form the dry expanding tampon pledge,

wherein a percent ratio of said plurality of non-absorbent fibers to said plurality of absorbent fibers is about 25/75 to about 65/35, and

wherein immediately after complete ejection from an applicator, and prior to contact with menses, the dry expanding tampon pledge has a free diameter at a widest point from about 25% to about 300% larger than a diameter of the dry expanding tampon pledge in the applicator.

17. Canceled.

18. (Previously presented) A dry expanding tampon pledge comprising:

a plurality of non-absorbent fibers, wherein said plurality of non-absorbent fibers are selected from the group consisting of polyester, polypropylene, polyethylene, aramid, nylon, acrylic, bicomponent, and mixtures thereof; and

a plurality of absorbent fibers, wherein said plurality of absorbent fibers is a combination of rayon fiber and superabsorbent fiber present in a percent ratio of rayon fiber to superabsorbent fiber of about 70/30,

Serial No.: 09/414,764

Group Art Unit: 3761

wherein said plurality of non-absorbent fibers and said plurality of absorbent fibers are blended together to form the dry expanding tampon pledge, and

wherein immediately after complete ejection from an applicator, and prior to contact with menses, the dry expanding tampon pledge has a free diameter at a widest point from about 25% to about 300% larger than a diameter of the dry expanding tampon pledge in the applicator.

19. (Original) The tampon pledge of claim 18, wherein a percent ratio of said plurality of non-absorbent fibers to said plurality of absorbent fibers is about 25/75 to about 65/35.

20. Canceled.

21. Canceled.

22. (Previously presented) A dry expanding tampon pledge comprising:

a plurality of non-absorbent fibers, wherein said plurality of non-absorbent fibers are selected from the group consisting of polyester, polypropylene, polyethylene, aramid, nylon, acrylic, bicomponent, and any combinations thereof; and

a plurality of absorbent fibers made of a combination of rayon fibers and superabsorbent fibers,

wherein said plurality of non-absorbent fibers and said plurality of absorbent fibers are blended together to form the dry expanding tampon pledge, and

wherein immediately after complete ejection from an applicator, and prior to contact with menses, the dry expanding tampon pledge has a free diameter at a widest point from about 25% to about 300% larger than a diameter of the dry expanding tampon pledge in the applicator.
